

## IFSEC 2008

Welcome to the Wavestore product update. At IFSEC this year we will have several new technologies to demonstrate. Please Visit us on Stand 19129/19131 (Hall 19 - CCTV Village).

Products on display include:

- A new compact NVR solution
- High quality H.264 recorders
- HiNet - Hybrid recording solutions
- IP/megapixel cameras
- Body worn video recorders
- Video analytics for counting, queuing, tracking and alerting
- Intelligent cameras for ANPR, speed detection and object monitoring

## New Wavestore Software, with Security Enhanced Linux

The latest upgrade adds a range of new features to the dependable and intuitive software. These include quick'n'easy IP/megapixel camera installation, support for H.264, MPEG-4, and MxPEG (Mobotix protocol), improved DVD video/audio backup, plus USB support for better copying and archiving of video files to CD, DVD or mass storage devices.

## Cameras at work:

We will be demonstrating the following technologies:

- Axis, Arecont, IQEye, Mobotix and Sony cameras.
- Intelligent IP (network) cameras from Intellio for event detection & management.
- Stereo video camera from Brickstream for behavioural monitoring, tracking & detection.

## Compact Network Video Recorder (NVR)

The Wavestore Topaz is extremely compact, yet enables up to 4 Terabytes of storage in front loading caddies. Ideal for accepting IP and megapixel cameras of all makes, it can record and playback multiple images simultaneously in a combination of H.264, MJPEG, MPEG4, and MxPEG formats. Measuring just 260 x 260 x 140 mm Topaz boasts a performance normally only found in high-end systems.

*An introductory offer is available on 4 and 9 camera systems within the qualifying period\* – for more details contact [info@wavestore.com](mailto:info@wavestore.com)*

## Low Power Mobile Recorder

## Open Platform Linux Software (OPL)

Wavestore OPL is a Security Enhanced Linux CCTV software suite that does not require a Microsoft Windows license, firewall or anti-virus software. This well proven software operates on a wide range of commercial and industrial platforms and includes 5 remote client licenses for Linux or Windows PC users.

*To coincide with IFSEC 2008 we have a special introductory offer on the software for a 4 IP camera silver level license at a unit price of £99.00 (This offer is limited to a maximum of 5 licenses per individual or company, and taken within the qualifying period\*, and is available to OEM and systems integrators).*

## Case Study: St. Dominic's Sixth Form College

The building of a new science block at the school meant that additional cameras and a new single recording and playback platform were required that could be integrated with existing analogue CCTV cameras. Following a competitive tendering process, Wavestore technology was selected due to its scalability and future-proofing.

### Do analogue and digital CCTV cameras work easily side-by-side?

It's a question that St. Dominic's Sixth Form College has now successfully answered. Thanks to ECL-IPS, the internet protocol integrator and Mayflex (Wavestore's distributor in the UK), St. Dominic's has retained its old analogue cameras, added new digital IP cameras, and made its surveillance system much simpler to use.

Read the full case study [here](#) or at [www.mayflex.com](http://www.mayflex.com).

## (Hybrid DVR/NVR)

Little Gem is a tiny yet powerful recorder for mobile and rapid deployment applications. The Hybrid DVR version will record up to 8 analogue cameras (with a global image rate of 100ips), plus up to 16 IP or megapixel cameras. Little Gem can be remotely monitored via a Windows PC on a network, or supplied with a wireless transceiver.

*\*A request for either of these offers should be sent to [info@wavestore.com](mailto:info@wavestore.com) before the end of the qualifying period which is 5pm 29th May 2008.*
